PROFESSIONAL PROJECTS

LTCMS

As Junior Full Stack Developer

Worked on a Laravel-based CMS platform as a Junior Full Stack Developer. Assisted in frontend and backend development, database operations, CRUD functionality, admin modules, user management, and fixing existing application issues. Also worked on the eCommerce shop interface by developing responsive layouts, product sections, and improving the overall user experience.

PrepCenter

- Developed an online system for managing product orders and staff, using PHP 8.1 and Laravel 9.1.
- Created tools to manage product orders, track inventory, and evaluate staff performance, including features like keystroke tracking and clock-in times.

- Integrated project management tools to streamline order and product management for the team.

Asian Promotion

- Developed AsianPromotions., an internal product and staff management system for Asian- Promotions.com using PHP 8.1, Laravel 9.1, and MySQL, enabling efficient order management, inventory tracking, and staff performance monitoring with features like keystroke tracking and clock-in times.
- Integrated project management tools to streamline team workflows, while supporting the platform's core functionality of aggregating coupon codes and promotional deals for users and providing merchants with tools to publish and manage offers, improving operational efficiency and user engagement.
